

X. INTRODUCTION TO ANTIVIRUS

Aim:

Understand how antivirus software works and what detection techniques are used to bypass malicious file checks.

Procedure:

1. Understand the concept and purpose of antivirus software in protecting systems from malware.
2. Install and configure an antivirus tool in the system.
3. Update virus definitions to ensure detection of the latest threats.
4. Perform different types of scans such as quick scan and full system scan.
5. Identify and analyze detected threats or suspicious files.
6. Take appropriate actions like quarantine or removal of malicious files.

Tasks:

Task 1: Introduction

Let's get started!

No answer needed

✓ Correct Answer

Task 2: Antivirus Software

What does AV mean?

Antivirus

✓ Correct Answer

Which PC Antivirus vendor implemented the first AV software on the market?

McAfee

✓ Correct Answer

Antivirus software is a ____-based security solution.

Host

✓ Correct Answer

Task 3: Antivirus Features

Which AV feature analyzes malware in a safe and isolated environment?

Emulator

✓ Correct Answer

An _____ feature is a process of restoring or decrypting the compressed executable files to the original.

unpacker

✓ Correct Answer

Read the above to proceed to the next task, where we discuss the AV detection techniques.

No answer needed

✓ Correct Answer

Task 4: Deploy the VM

Once you've deployed the VM, it will take a few minutes to boot up. Then, progress to the next task!

No answer needed

✓ Correct Answer

Task 5: AV Static Detection

What is the `sigtool` tool output to generate an MD5 of the `AV-Check.exe` binary?

f4a974b0cf25dca7fbce8701b7ab3a88:6144:AV-Check.exe

✓ Correct Answer

Use the strings tool to list all human-readable strings of the AV-Check binary. What is the flag?

THM{Y0uC4nC-5tr16s}

✓ Correct Answer

Task 6: Other Detection Techniques

Which detection method is used to analyze malicious software inside virtual environments?

Dynamic Detection

✓ Correct Answer

Task 7: AV Testing and Fingerprinting

For the C# AV fingerprint, try to rewrite the code in a different language, such as Python, and check whether VirusTotal flag it as malicious.

No answer needed

✓ Correct Answer

Read the Above!

No answer needed

✓ Correct Answer

Task 8: Conclusion

Congrats on completing the room, and keep learning!

No answer needed

✓ Correct Answer

Result:

Successfully studied and implemented antivirus protection by detecting, analyzing, and removing malicious threats, ensuring system security and integrity.
